Dear Sirs: I think US Government VS Micro Soft is a travesty of justice and a crime against the American public. Micro Soft is being punished for selling an ever better product for less and less. [Nobody points a gun at anyone for buying Windows the reason being they buy Windows because it works.] Remember our American motto with Liberty and Justice for all. A trust to work has to keep out competition from it s point in the market by force or the threat of force. i.e. the only way that this would be possible. i.e.to make it illegal by government fiat for anyone to compete against this business. Our US Mail service is a monopoly. No one but the incompetent US Post Office can deliver mail at ever worsening service and ever rising prices. And look at the result. It is not Micro Soft which gets better and better for less and less. We should be ever so grateful to Micro Soft instead of punishing them for being good at what they do. And to make what Micro Soft does so well a crime is first....UN-JUST....and second it deprives we citizens of our...FREEDOM... to choose the product we want at the price we want to pay. To continue to harass this manificent company is a crime beyond reason. Stop it if you have any decency left. Sincerely and with great contempt to the miserable scum who brought this crime of anti-trust against this manificent company Micro Soft. I remain Sincerely J. Billy VerPlanck
